| Step | Active branch | | Task |
|---|---|---|---|
| 0 | development | | **Refresh** remote status, and **pull** down latest development branch from `origin/development` |
| 1 | development | | **Branch** away into a feature branch, e.g. 'fix-reversals' |
| 2 | | fix-reversals | Make changes to files and save |
| 3 | | fix-reversals | **Commit** to the active feature branch. Make sure "Push changes immediately to..." is unchecked. |
| 4 | development | | **Switch** to development branch by right-clicking it and '**Checkout**' |
| 5 | development | | **Refresh** remote status, and (if any Pull flagged) **pull** down latest development branch from origin/development |
| 6 | development | | **Merge** your changes from feature branch *into* development branch. If no conflicts, you'll be able to do 8. |
| 7a | development | | If there are conflicts, find them by looking for the <<<<<<< HEAD text inside the file(s), then fix them, then save the file |
| 7b | development | | Commit your resolved file(s) to the development branch |
| 8 | development | | **Push** your local development branch up to origin/development |
| 9 | development | | **Delete** feature branch after having merged it into development |
| | Repeat 1-9 | | |
